BROWSER MUSIC EXPERIENCE

Chhath Mahaparv

Explore the sunrise introduction, browse the library and play available tracks.

QUICK START

Open: README local run instructions

Run locally:

```
python -m http.server 8000 --bind 127.0.0.1
```

Next: Run in the repository root; open http://localhost:8000

YOUR FIRST SESSION

01 Open the hosted page if a deployment URL is present in the GitHub About panel; otherwise run the local server above.

02 Skip or watch the four-day introduction. Browse the library and search by song or artist.

03 Use play, pause, next, previous, shuffle and seek. Embedded YouTube playback depends on internet and embed permissions.

04 Choose the local audio import control to play a recording on your device. The file stays in your browser.

05 If an embed fails, open the track's YouTube link.

DATA AND PRIVACY

Imported recordings are not uploaded. YouTube tracks stream through YouTube and follow its availability rules.

LIMITS TO KEEP IN MIND

This is a static browser app without bundled licensed music. No hosted deployment address has been verified.
